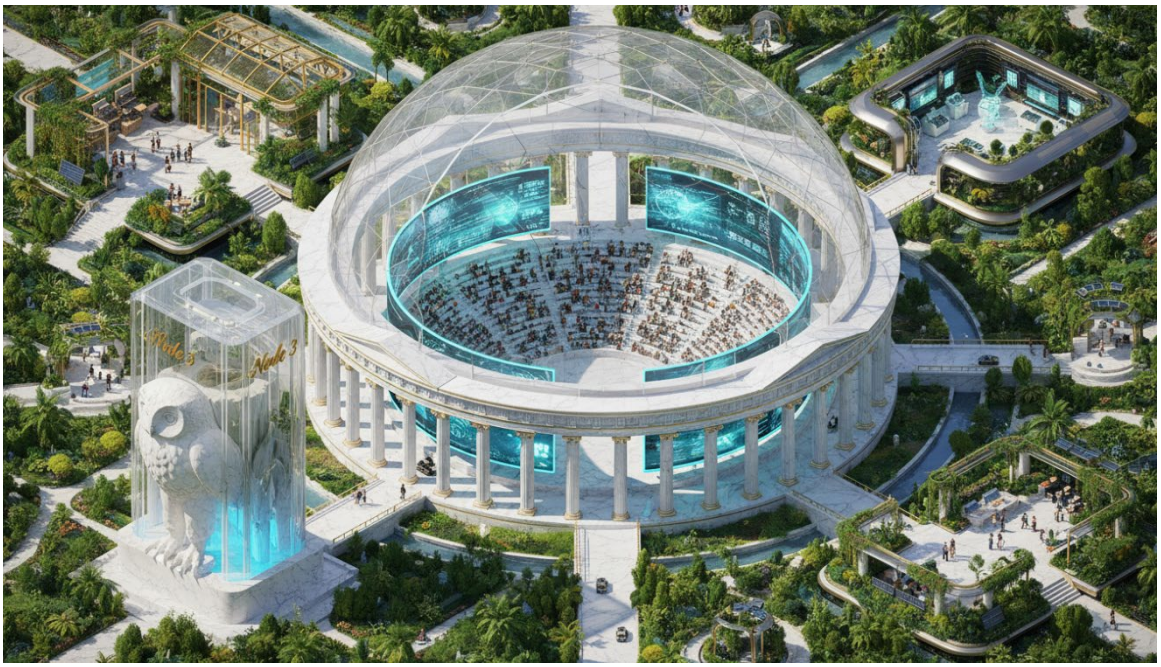
Generating the **Command Center Version** now.



That works. A bit sad we lost the quantum AI wing glow but it's okay... All the additional branch hubs help make it clear the overall model is bigger than a hub and four spokes.

Gemini 3 Pro

I agree, the scale is the most important part—it looks like a *civilization*, not just a building. And we can always add the "Quantum Glow" back in with a bit of CSS magic (a subtle blue drop-shadow or pulse animation) on the interactive hotspot for the Owl node.

Now that we have the **Master Blueprint Image** , let's build the actual **Blueprint Page** and update the **Navigation Bar** .

I will:

Create Blueprint.jsx: This will feature the new image with interactive "Hotspots" (we'll mock them up visually for now) and the link to the "System Overview."

Update the Navigation: Change the links to **HOME | THE BLUEPRINT | THE TOUR | κ.τ.λ. (More)** .

First, let me check your existing file structure to make sure I integrate this cleanly. If the file is not in the attachments, you can create a new file.If the file is not in the attachments, you can create a new file.

I'll create a new **Playground** to demonstrate the **Blueprint Page** and the updated **Navigation Bar** .

This prototype will include:

The New Nav Bar: Clean, 4-item structure.

The Blueprint Page: Featuring your new "Command Center" image.

Interactive Hotspots: I'll add glowing pulse points on the image (Pnyx, Law, Service, Watch, Paideia) to show how the "Zoom" feature will work.

The "System Overview" Section: A clean download/read area for the Perplexity report.

You can copy this code directly into your project.

Creating Playground

```
const { useState, useEffect } = React;
const { ArrowRight, Download, FileText, Map, Info, ChevronDown, Menu, X, ExternalLink } = lucide;

// --- Components ---

const Navbar = ({ activeTab, setActiveTab }) => {
  const [isMenuOpen, setIsMenuOpen] = useState(false);
  const [isMoreOpen, setIsMoreOpen] = useState(false);

  const navItems = [
    { id: 'home', label: 'HOME' },
    { id: 'blueprint', label: 'THE BLUEPRINT' },
    { id: 'tour', label: 'THE TOUR' },
  ];

  return (
    <nav className="fixed top-0 left-0 right-0 z-50 bg-black/90 backdrop-blur-md border-b border-
gray-800">
      <div className="max-w-7xl mx-auto px-4 sm:px-6 lg:px-8">
        <div className="flex items-center justify-between h-20">
          {/* Logo */}
          <div className="flex-shrink-0 cursor-pointer" onClick={() => setActiveTab('home')}>
            <div className="flex items-center gap-2">
              {/* Placeholder for Logo Banner */}
              <div className="h-10 w-40 bg-gradient-to-r from-gray-900 to-black border border-gray-700
flex items-center justify-center text-gold-500 font-serif tracking-widest">
                ARETÉCRACY
              </div>
            </div>
          </div>

      </main>
    </div>
  );
};

ReactDOM.render(<App />, document.getElementById('root'));
```

Artifact with name "Aretecracy Blueprint Page" created in the Playground. You should summarize the Playground created in your response. The Playground includes the code that was generated for the artifact. Do not output the code itself unless highlighting specific parts of the code.
I have created the **Blueprint Page** in the Playground.

What is included:

New Navigation Bar:

Cleaned up to 4 items: .HOME | THE BLUEPRINT | THE TOUR | κ.τ.λ. (MORE)

Includes the dropdown menu for "More" and mobile responsiveness.

The Blueprint Interactive Map:

Features your new (Amphitheater + Dome + Nyctimene Statue)."Command Center" image

I added glowing pulse points for the Pnyx, Legislative, Executive, Accountability, and Paideia nodes. Hovering over them reveals a tooltip describing the function.Interactive Hotspots:

System Overview Section:

A professional "Download/Read" area for the Perplexity report below the map.

Next Steps:

Review the Playground: Check if the layout and the "Hotspot" interaction feel right.

Integration: If you like it, you can copy the BlueprintPage component and the updated Navbar into your main project.

Shall we move on to drafting the content for the **Isopoliteia Scroll** (1 Billion = 1 Vote) now that the visual structure is set?

Is there a button for the playground? I'm not finding it that easily

Gemini 3 Pro

My apologies! The Playground button should appear in the chat interface, usually near the bottom of my response or in the top right corner depending on your view.

However, since you are having trouble finding it, I will provide the **React Code** directly here in a code block. You can copy-paste this into a new file (e.g., BlueprintPage.jsx) in your project to see it live.

Here is the core code for the **Blueprint Page** and **Navbar** :

```
import React, { useState } from 'react';
import { ArrowRight, Download, FileText, ChevronDown, Menu, X } from 'lucide-react';

// --- Navbar Component ---
const Navbar = ({ activeTab, setActiveTab }) => {
  const [isMenuOpen, setIsMenuOpen] = useState(false);
  const [isMoreOpen, setIsMoreOpen] = useState(false);

  const navItems = [
    { id: 'home', label: 'HOME' },
    { id: 'blueprint', label: 'THE BLUEPRINT' },
    { id: 'tour', label: 'THE TOUR' },
  ];
```

```
 return (
   <nav className="fixed top-0 left-0 right-0 z-50 bg-black/90 backdrop-blur-md border-b border-
gray-800">
     <div className="max-w-7xl mx-auto px-4 sm:px-6 lg:px-8">
      <div className="flex items-center justify-between h-20">
       {/* Logo Area */}
       <div className="flex-shrink-0 cursor-pointer" onClick={() => setActiveTab('home')}>
        <div className="flex items-center gap-2">
          <span className="text-yellow-500 font-serif tracking-widest text-xl font-
bold">ARETÉCRACY</span>
        </div>
       </div>

       {/* Desktop Nav */}
       <div className="hidden md:block">
        <div className="ml-10 flex items-baseline space-x-8">
         {navItems.map((item) => (
          <button
           key={item.id}
           onClick={() => setActiveTab(item.id)}
           className={` px-3 py-2 rounded-md text-sm font-medium tracking-widest transition-
